

Reviews: Science and Pseudoscience of Children's Mental Health

"This very timely volume, on an exceptionally important topic in the lives of children and families, is a frank and thought-provoking consideration of the issues." —**Frank Farley**, PhD, Former President, American Psychological Association

“Informative and provocative! This book should be required reading for anyone concerned with children’s mental health.” —**Irving Kirsch**, Author of *The Emperor’s New Drugs: Exploding the Antidepressant Myth*
